**Q: Can I receive any High Definition TV channels *without* using a cable or satellite box?**

A: Yes. If you have a TV that is equipped with an ATSC/QAM tuner you can receive digital local network programs for free whether you are on cable or using an antenna.

Cable Subscribers: Cox Communications does not scramble the local digital network channels. These channels can be tuned in using the **QAM tuner** that is in all HDTV's built after March of 2007. Cox has assigned these CADTV channels their own set of channel numbers that can only be accessed with the QAM tuner. (See chart below). For HD Cable Channels such as ESPN-HD, Fox News HD & Discovery Channel-HD you will need to get a HD Receiver Box from your cable or satellite provider because HD cable channels are scrambled and must be unscrambled by the HD Receiver Box.

Antenna or Satellite Users: All the major local TV broadcast stations are broadcasting digital & HD signals from their transmitters on specific UHF & VHF bands set aside by the FCC for digital broadcasts. All that is required to receive these digital broadcasts is a good UHF/VHF antenna and a TV with the **ATSC tuner**. These digital channels can be accessed only with an ATSC tuner and their channel numbers are different than the analog broadcast channel numbers.

Network	Analog Antenna #	Analog Cable #	ATSC Digital Antenna #	QAM Digital Cable #
NBC (KSN)	N/A	3	3-1	115-1
FOX (KSAS)	N/A	4	24-1	116-10
